Fredericton, N.B.
E3B 5H1

Minister: Hon. Malcolm MacLeod
Deputy Minister: B. Walker

INTRODUCTION

The principal purpose of the Timber Utilization Survey is to provide reliable information on primary industrial fibre consumption as a basis for forest resource management planning. It also provides information on individual mill consumption as well as fibre imports and exports.

The tables presented in the report summarize information collected by the Department's Regional staff for the fiscal year April 1, 1985 to March 31, 1986. All pulp and paper mills, fibre board and plywood plants were sampled. However, only those sawmills consuming more than 500 m^3 of roundwood were included in the survey. As a result, total roundwood consumption in any Resource Region may be slightly higher than the survey indicated.

The figures appearing in Part I summarize the industrial roundwood harvest and consumption on a Regional basis, by industry type. Part II summarizes the destination, including exports, of the industrial roundwood harvested on a Regional Basis, by industry type. Part III lists individual mill consumption of roundwood on a Regional basis. Part IV lists those pulp and paper mills consuming chips and other sawmill residues as well as individual sawmills producing such chips on a Regional basis. Part V lists all mills importing and exporting roundwood and chips on a Regional basis.

All figures presented in the following tables are in cubic metres. The appropriate conversion factors may be found in Appendix I at the back of the report.
